

AMENDMENTS TO THE DRAWINGS

The attached sheet of drawings includes changes to Figure 3. This sheet replaces the original sheet.

In the original Figure 3, a number of reference labels were omitted or did not identify the correct component as recited in the specification. Changes to Figure 3 consist of adding missing reference labels and correcting incorrect reference labels. More specifically, reference label 226 has been added to reference knowledge module (see at least page 25, line 13), reference label 212 has been added to reference network (see at least page 30, line 18), reference label 260 has been added to reference RX (see page at least page 36, line 15), and reference label 216 has been added to reference medical module (see at least page 36, line 10). Reference label 256 has been altered to identify ancillary modules (see at least page 36, line 11).

Also, in the original Figure 3, the name of some components did not correspond to the name of the components in the specification. Changes to Figure 3 consist of correcting names to correspond to the specification. More specifically, inference engine 232 has been changed to inference module 232 (see at least page 27, line 7), communication module 242 has been changed to communication interface 242 (see at least page 30, line 15), application module 254 has been changed to application server 254 (see at least page 35, line 17), and web module 252 has been changed to web server 252 (see at least page 35, line 6).
